

HOTBRAY
LTD.

Distributors of
quality spare parts
throughout the world

eurospare®

Founded in 1972

as an export distributor for Unipart, **Hotbray** soon became established as the primary single source for genuine Jaguar, Land Rover and Rover vehicle parts for customers around the world*.

Despite the many changes that have taken place over the years, **Hotbray** has maintained a close working relationship with each of these manufacturers to ensure that comprehensive and efficient spare parts supply continues without interruption to even the remotest regions in which their vehicles operate.

*destination regions subject to JLR approval)

A branded Jaguar vehicle can be traced back to 1935, and the manufacturing company behind it back even further.

Throughout its long history, Jaguar have provided some of motoring's most emotive vehicles, from the XK120 of 1949 (that actually did 120mph) through to the all-time iconic E-Type (first released at Geneva in 1961) and now, of course, the F-Type that proudly markets itself with the tag line

'IT'S GOOD TO BE BAD'...

Along the way, Jaguar have racked up 7 Le-Mans victories (courtesy of C-Types, D-Types and XJRLM's sports prototypes) and had a brief foray into F1.

Now incorporated with Land Rover, under the global umbrella Jaguar Land Rover Ltd (JLR), they are the largest UK automotive manufacturing business, and the top investor in R&D in UK manufacturing.

Hotbray are proud to be able to offer the full range of genuine wholesale Jaguar parts throughout the world, *subject to market approval*. We regularly deal with Jaguar's regional headquarters on three different continents, so have a rather unique working relationship.

Since 2005 Hotbray have been appointed by Jaguar to support several of their own dealers around the world with genuine wholesale spare parts.

Hotbray have also been appointed to provide technical parts stock lists and vehicle 'Scaling' spare parts packs for future dealer appointments.

Where Market Approval for the sale of Genuine Jaguar parts is not available we are pleased to offer you Aftermarket and OEM quality spare parts through our eurospare programme.

Hotbray can offer genuine wholesale spare parts through our extensive links and long term relationship with Jaguar Ltd.

HOTBRAY LTD.
AUTHORISED PARTS DISTRIBUTOR.

Jaguar Land Rover

is the UK's largest premium automotive manufacturing business, built around two iconic brands. Land Rover is the leading manufacturer of all-wheel-drive vehicles, and Jaguar one of the world's premier luxury sports saloon and sports car marques.

After Tata Motors acquired Jaguar and Land Rover in 2008, it merged the two into a single company and since then its success has flourished.

Did you know?

Over the past six years, Jaguar Land Rover has doubled sales and employment, more than tripled turnover, and invested more than £15 billion in new product creation and capital expenditure.

With a balanced regional distribution of sales, in 2016 Jaguar Land Rover sold more than 583,000 vehicles, up 20% on the previous year. Of the total, Jaguar sold 148,730 vehicles and Land Rover sold 434,583 vehicles.

Jaguar Land Rover is one of the UK's largest exporters and generates around 80% of its revenue from exports.

Our Products

The continually expanding range of JLR vehicles available in the market place dictates the requirement for an equally expanding range of aftermarket parts.

JLR vehicles are now firmly established as mainstream marques requiring comprehensive coverage throughout the IAM wholesale business sector. **Hotbray** strives to match this increasing demand with a continuous flow of new products being made available from our stock.

The range offered includes a high proportion of OEM product, supported by strong brands known well to the industry.

GKN, TRW, Denso, Dayco, Mahle, VDO, Siemens, Lucas, Mann, Sogefi, ZF, Lemforder, Bosch, Marelli, Behr, Hella, Federal Mogul, TMD, SMPE, Dunlop and BWI are but a few of the major brands represented.

Supplementing this range is our own brand of direct-from-the-manufacturer lines - "eurospare".

eurospare®

In order to provide our customers with a wider selection of product lines at the most competitive prices, many of which are "first-to-market", **Hotbray** has established its own brand "eurospare".

In addition to many of the more specialised individual products developed, the eurospare brand encompasses many product groups which include;

- **Brake Disc and Pads**
- **Engine gaskets and seals (Many unique gasket sets and repair kits)**
- **Steering and Suspension**
- **Electrical: Rotating, HT lead sets, engine management**
- **Cooling hoses**
- **Water pumps**

Brake Pads

As part of the eurospare programme we have developed a eurospare and a Premium eurospareXP brake pads range.

The pad sets have been introduced to complement our existing Brake Disc Range which is also available in eurospare and premium eurospareXP qualities.

All brake pads are fully certified to ECE R90 regulations.

Fitting Kits are available to purchase separately and include everything required to fit the pads.

Brake Discs

The range of eurospare brake discs is constantly growing, we hold stock for both Jaguar and Land Rover vehicles.

Our premium eurospareXP range of geomet treated brake discs are available for later Jaguar and Land Rover models.

The geomet treatment will maintain corrosion resistance even after repeated heat cycles of 350°F for 96 hours; it will also typically resist a salt spray test for longer than 480 hours. All discs are sold singularly and are packaged in our premium branded boxes.

Our standard range covers most of JLR applications.

For more information on these parts please contact sales@hotbray.net

Air Springs and Damper Modules.

Hotbray Limited is very happy to be a primary distributor for **BWI Group air springs and damper modules**. The parts are made to OEM specifications.

BWI Group manufactures not only a range of dampers (struts and shock absorbers) but also complete damper modules. These modules can use either passive or controlled dampers.

The BWI McPherson Strut Suspension Module was born from a challenging customer requirement requesting an air spring module with side load compensation. This was successfully performed for the first time in the automotive industry in 1999.

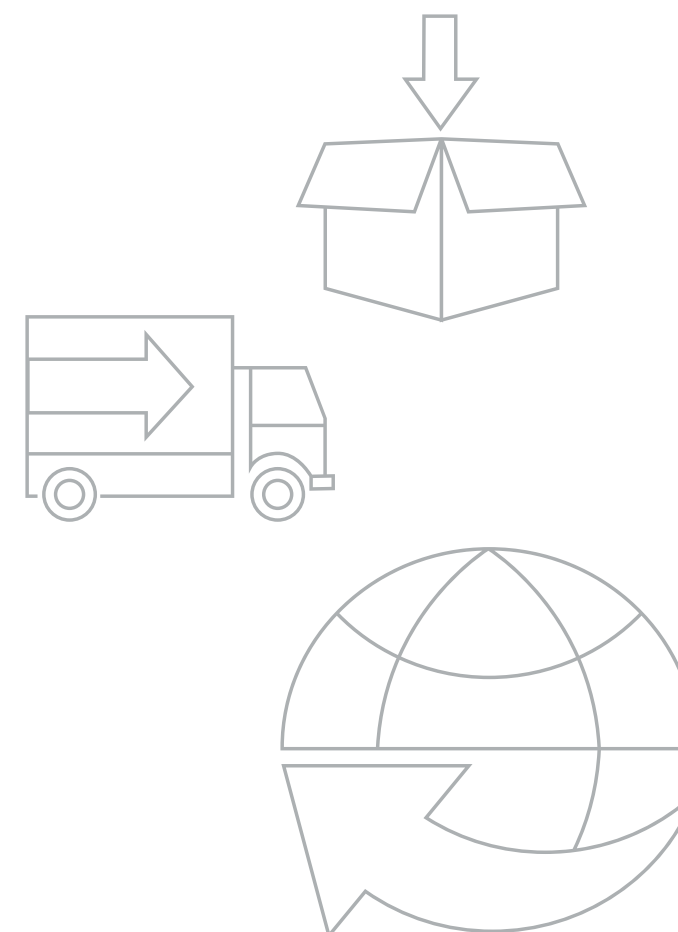

This is still used by Range Rover today on this same platform.

The design was made to survive extreme off-road conditions while still being an integral component of the most comfortable air suspension on road. All modules are validated and tested in extreme off and on road conditions to help ensure performance and durability for the customer.

It is designed to be air tight for the life of the vehicle.

The unit is supplied fully assembled and 100% tested for air leak.

For more information on these parts please contact sales@hotbray.net

Customer Support

Every customer will have a dedicated administrator who can be relied upon to provide prompt and efficient responses to technical, pricing and availability enquires. The administrator will ensure that delivery schedules are maintained and backorders given priority.

Direct access to the latest EPC system can be arranged and regular price updates provided.

Our **HotSupport customer website** can be accessed to check for stock availability, orders in progress and price file information.

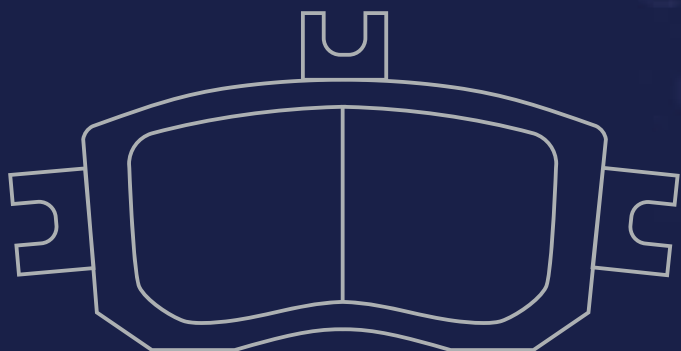

The **Hotbray** computer system is totally "bespoke" allowing documentary presentation to be refined to meet an individual customer's requirements.

Export

With over 45 years of experience **Hotbray** has become adept in export to almost every region of the globe.

Training with regard to packing, handling and documentary procedures is always maintained at the highest level to meet ever-changing legal and safety requirements. Hotbray is geared to expediting regular and large cargo deliveries without delay or complication.
